

Circuit track (G $\frac{1}{2}$)

Art. No.: 42518

€14,40

Circuit track with potential-free switching contact, with bedding.

Length 115 mm (half standard length).

- Triggers a switching pulse while travelling with axles having a wheel flange height of 1.1 mm (ROCO standard). Using wheel flanges with a varying height can result in malfunctions.
- With fault clearance to avoid switching spikes.
- With bumper protection
- Can also be used as a response instantaneous contact along with a response module or detector 10808.
