

Curved turnout right BWr2/3

Art. No.: 42557

€32,90

Curved turnout right hand BWr2/3 with bedding, manually operated.

Radius of main track and branch track 358 mm (R2), arc angle 30°, polarization pre-installed.

Suitable electric turnout drive: 42620 or 42624.

Note:

The curved turnouts R2/R3 are only conditionally suitable for to-scale express coaches with a length-over-buffers exceeding 300 mm because the parallel track separation narrows at the turnout, causing problems if long wagons meet at the turnout.

Specifications:
