

Universal bedding switch drive

Art. No.: 42620

€14,60

Universal bedding switch drive. Low switching current consumption, limit switch.

Note please: Like all ROCO switch drives, this drive of course features a limit switch. However, as the adjuster of the drive is held in its end position by the tongue adjustment mechanism of the switch itself (and only then will the limit switch function reliably), please do not try out the switch drive unless it is clip-connected to a switch.
