

Diesel locomotive class 2048, ÖBB

Photomontage

ÖBB

Epoch: V

14+

Art. No.: 58561

€219,90

Diesel locomotive class 2048 of the Austrian Federal Railways.

- ÖBB version with true to original sound functions available for the first time
- Delicately designed model with many extra applied plug-in parts
- With switchable shunting light, high beam and individually switchable headlight or tail light in digital mode

The introduction of the new train "Austro Takt" in June 1991 caused a shortage of diesel locomotives with electric train heating at the ÖBB. The ÖBB, therefore, procured thirty-four DB locomotives class 211 to use then, the locomotives class 2043 and 2143 for passenger train services. The locomotives motorized with a Caterpillar engine hauled goods trains and provided shunting services in Wels, Vienna North, Amstetten and Krems.

Specifications:

General data

Coupling	NEM shaft 362 without close coupling mechanism
Minimum radius	358 mm
Number of axles with traction tyres	2
Number of driven axles	2
Flywheel	yes

Electrical

Interface	Electrical interface for traction units PluX22
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
Digital decoder	PluX22
Decoder type	MS450P22
Sound	yes
LED head light	yes
Additional light function	yes

Measurements

Length over buffer	141 mm
