

Switching track

Art. No.: 61117

€23,90

Switching track with potential-free switch contact, length 100 mm.

- Triggers a switching pulse while running axles with a wheel flange height of 1.1 mm (ROCO standard). Using wheel flanges with a varying height can result in malfunctions.
- With fault clearance to avoid switching spikes.
- With buffer protection
- Can also be used as feedback-momentary contact along with feedback module 10787 or detector 10808.
