

z21 Wifi Package

Art. No.: 10814

€42,90

The z21 start can be extended to a network-enabled control center by using Access Point and an activation code.

- You can easily control both trains as well as turnouts with your Smartphone or tablet via the popular Z21 App.
- Self-explanatory control functions for your model railway layout (through icons, image integration etc.)
- You can automate routes
- Control your locomotives with photorealistic driver's cabs for the ultimate driving experience – feel like a real locomotive driver
- It lays the basis for PC guided automations (e.g. with Rocrail®, iTrain®, TrainController® etc.)

Click [HERE](#) for more information!

The z21 start WLAN package contains a preconfigured router and the activation code for the z21 start. This way the z21 start can accept commands for locomotives and turnouts via the WiFi interface and process them.

Go here for your: [Unlock code](#)

Info: system requirement is a Windows PC or notebook as well as an existing Internet connection (only for activation of the Unlock code).

Contents:

- Wifi Router
- Switching power supply
- Unlock code
- Manual
