

Pocket wagon T3, AAE

Epoch: VI
14+

Art. No.: 76221 €64,90

Pocket wagon, type Sdgmns 33, of the Ahaus Alstätter Eisenbahn AG. The wagon carries a semi-trailer of the forwarding agent LKW Walter. New design ! The wagon carries a newly constructed truck semi-trailer: ■ Axles adjustable to simulate deflated air suspension ■ Folding rear underrun protection for prototypical loading The type T3 wagon followed the type T1 wagon at the beginning of the 1990s. With a total length of 18.340 mm, the type T3 wagon is almost 2 m longer than its predecessor model and has a load limit of 69 t. So any registered trailer can be loaded and transported to its destination. However, the length is not optimal to carry containers, but still ideal for the transportation of 24'/26'; swap bodies due to the higher load limit.

Specifications:

General data

Coupling	NEM shaft 362 with close coupling mechanism
AC Wheel set Article number	40179

Measurements

Length over buffer	211 mm
