

Steam locomotive class 86, ÖBB

ÖBB

Photomontage

Epoch: III

14+

Art. No.: 73030

€314,90

Steam locomotive class 86 of the Austrian Federal Railways.

- All typical ÖBB characteristics such as the whistle
- Long cut-out water tank in a welded design
- Unobstructed view through the driver's cab windows
- Smoke generator retrofittable

The steam locomotive class 86 was a standard locomotive with tender which was built in large quantities by numerous German locomotive factories for the German Reichsbahn. After the war some of the steam locomotives remained in Austria and were used for the passenger and freight transport. The locomotive also hauled heavy ore trains together with the class 52 - which definitely was her most spectacular mission! The locomotives had their main bases at the depots Hiefrau, Selzthal, Linz, Bischofshofen and St. Veit (Glan). They were scrapped in 1972.

Specifications:

General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Number of axles with traction tyres	1
Smoke generator Article number (analog)	Seuthe Nr. 10
Smoke generator Article number (digital)	Seuthe Nr. 11
Number of driven axles	4
Smoke generator retrofittable	yes
Flywheel	yes

Electrical

Interface	Electrical interface for traction units PluX22
Head light	Direction dependent dual headlights
LED head light	yes

Measurements

Measurements

Length over buffer

160 mm
