

Steam locomotive 86 261, DRG

Epoch: II

14+

Art. No.: 79027

Steam locomotive 86 261 of the Deutsche Reichsbahn Gesellschaft.

Mold variant !

- Rich detailing on the model with many separately applied plug-in parts
- Short cut-out water tank in a welded design
- Set of elaborately designed metal wheels
- The model has true to original double headlights

From 1928 to 1943, almost all German locomotive factories delivered this type of locomotive to the Deutsche Reichsbahn Gesellschaft (altogether 775 locomotives). The 1000-PS locomotives were designed to reach a maximum speed of 70-80 km / h, this meant that they could not only be used in their main application field for "branchlines" but also for main and feeder lines.

Specifications:

General data

Number of axles with traction tyres	1
Number of driven axles	4
Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Smoke generator retrofittable	yes
Smoke generator Article number (digital)	Seuthe Nr. 11

Electrical

Sound	yes
Interface	Electrical interface for traction units PluX22
Head light	Direction dependent dual headlights
Buffer capacitor	yes
Digital decoder	PluX22
	MX645P22
