

Diesel locomotive class 215, DB

Epoch: IV

14+

Art. No.: 72182

€274,90

Diesel locomotive class 215 of the Deutsche Bundesbahn. Model painted with old red colour in original condition.

Mold variant !

- Model as delivered from factory. No additional shunting handle or buffer footstep
- The model has no UIC plug-in
- Z21-Driver's cab available

The class 215 was first a diesel locomotive of the DB. Later on, the Deutsche Bahn AG used it in the moderate passenger and freight traffic. It was bought as a variant of the vehicle-family V 160 at short sight and was then equipped with heating steam generators. The main reason for the creation of the class 215 was that the class 218 at that time had not yet reached the serial production stage.

Specifications:

General data

Number of axles with traction tyres	1
Number of driven axles	4
Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Flywheel	yes

Electrical

Digital decoder	PluX16
Sound	yes
Interface	Electrical interface for traction units PluX16
Head light	Two direction dependent tail lights and dual headlights.
Motor	5-pole motor
Buffer capacitor	yes
LED head light	yes

Measurements

Measurements

Length over buffer

189 mm
