- The model in epoch III is now available with sound decoder
- Model with LED headlights
- Sound in cooperation with Leosoundlab

After having served as a test carrier for quite a long time, the series V 100 locomotive went into series production from 1961/62 on. It was used for mixed traffic operations on non-electrified lines and for easy services on main lines. With an output of 1100 hp (810 kW) it was authorized to run with a maximum speed of 110 km / h. In 1968 the locomotives were named class 211.

### Specifications:

#### General data

Number of axles with traction tyres	2
Number of driven axles	2
Coupling	NEM shaft 362 without close coupling mechanism
Minimum radius	358 mm
Flywheel	yes

#### Electrical

Sound	yes
Motor	5-pole motor
Interface	Electrical interface for traction units PluX22
Head light	Two direction dependent tail lights and dual headlights.
LED head light	yes

#### Measurements

Length over buffer	139 mm
