

Steam locomotive 086 400-9, DB

Epoch: IV

14+

Art. No.: 78318

€374,90

Steam locomotive 086 400 of the Deutsche Bundesbahn.

Mold variant !

- * Model version with "De Limon wheel flange lubrication"
- * Rich detailing on the model with many separately applied plug-in parts
- * Long cut-out water tanks in a welded design
- * Delicately designed metal wheel sets
- * Unobstructed view through the driver's cab windows

After the end of the Second World War, there were 386 locomotives of the class 86 stationed in the West German territory. Most of them were repaired, so the DB had in 1952, 378 locomotives of this series registered in their vehicle fleet. Additionally to the classic branch line trains, the machines also hauled regularly express trains and were used for shunting services in freight yards. The last machines, by then designated as class 086, were decommissioned from the DB in 1974.

Specifications:

General data

Number of axles with traction tyres	1
Number of driven axles	4
Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Smoke generator retrofittable	yes
Smoke generator Article number (digital)	Seuthe Nr. 11

Electrical

Sound	yes
Interface	Electrical interface for traction units PluX22
Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.

Electrical

Buffer capacitor	yes
------------------	-----

Digital decoder	PluX22
-----------------	--------

	MX645P22
--	----------

LED head light	yes
----------------	-----

Measurements

Length over buffer	160 mm
--------------------	--------
