

1st class double deck coach, SBB

Epoch: VI
14+

Art. No.: 74493

1st class double deck coach type A "IC2020" of the Swiss Federal Railways.

Update!

- Model in current design with black ribbon windows
- Equipped with a new gaiter

The complete makeover of the IC2000 vehicle fleet is the largest vehicle modernization in the history of the long-distance traffic at the SBB. During the refurbishment and renewal of the interior, the colour and material concept of the new long-distance trains is also applied to the IC2000 vehicle fleet. By converting the lighting to LED bulbs and to new indirect light, the interior appears brighter and friendlier. In the business zone - the first coach behind the locomotive - a new working area is being built, which will allow for four seats per composition, and make working on a large work surface especially pleasant.

Specifications:

General data

Interior lighting Article number	40360
Interior fitting	Model with interior furnishing
Interior fitting	Interior lighting can be retrofitted
Coupling	NEM shaft 362 with close coupling mechanism
AC Wheel set Article number	40196

Measurements

Length over buffer	303 mm
