

## Double deck control cab car, SBB

Epoch: VI  
14+

Art. No.: 74499 ~

Double deck control cab car class Bt "IC2020" of the Swiss Federal Railways.

Update!

- Design update with new handles, separately applied windscreen wipers and new SBB logo
- Equipped with a new gaiter
- Model for AC operation now available from factory for the first time
- Headlights and rear lights are switchable via decoder

The complete makeover of the IC2000 vehicle fleet is the largest vehicle modernization in the history of the long-distance traffic at the SBB. During the refurbishment and renewal of the interior, the colour and material concept of the new long-distance trains is also applied to the IC2000 vehicle fleet. By converting the lighting to LED bulbs and to new indirect light, the interior appears brighter and friendlier. In the business zone - the first coach behind the locomotive - a new working area is being built, which will allow for four seats per composition, and make working on a large work surface especially pleasant.

### Specifications:

#### General data

Interior lighting Article number	40360
Interior fitting	Model with interior furnishing
Interior fitting	Interior lighting can be retrofitted

#### Electrical

Interface	Electrical interface for traction units PluX16
Head light	Two direction dependent tail lights and dual headlights.
Digital decoder	PluX16
LED head light	yes

#### Measurements

Length over buffer	303 mm
