

Electric locomotive 192 002-4, SIEMENS

Epoch: VI
14+

Art. No.: 71937 €294,90

Electric locomotive 192 002 of the Siemens Mobility Division.

Mold variant!

- True to original replica of the Smartron with new front panel and shunter steps
- The locomotive is used for the transport of goods.
- Freestanding handles - partially made of metal
- Sound creation in cooperation with the company Leosoundlab

Smartron locomotives are handed over to the owner with standardized equipment only in Germany. Based on the platform of the Vectron locomotive, the Smartron is being offered to the customers at attractive conditions. For rail operators the advantage is that the operation of the Smartron is identical to the Vectron locomotive and therefore no extensive training is needed. All locomotives are delivered in the attractive Capri blue livery, which is rounded off with the desired design of the respective customers. Visually, the Smartron differs from the Vectron locomotives in a modified front panel, shunter steps, side surfaces and the Smartron lettering. The Smartron is not available with the camera of the Vectron locomotive.

Smartron and Vectron are registered trademarks of the Siemens AG.

Specifications:

General data

Number of axles with traction tyres	1
Number of driven axles	4
Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Flywheel	yes

Electrical

Digital decoder	PluX22
Sound	yes
Interface	Electrical interface for traction units PluX22

Electrical

Head light	Two direction dependent tail lights and dual headlights.
LED lighting	yes
Buffer capacitor	yes
Motor	5-pole motor
Additional light function	yes
LED head light	yes

Measurements

Length over buffer	218 mm
