

Electric locomotive class 144, DB

Epoch: IV

14+

Art. No.: 52548

€139,90

Electric locomotive class 144 of the Deutsche Bundesbahn.

- Perfectly matches the "Silberlinge"
- For the first time with running number for push-pull-trains

From the electric locomotive series E 44, almost 200 locomotives were put into service in the period between 1932 to 1954. The power output of the 4-axled bogie locomotives was around 2,200 kW and the maximum speed was 90 km / h. The locomotive hauled passenger trains as well as goods trains and therefore quickly earned the nickname "girl Friday". Some locomotives were equipped with push-pull train control and were therefore used in suburban traffic in metropolitan areas.

Specifications:

General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Number of axles with traction tyres	1
Number of driven axles	4
Flywheel	yes

Electrical

Interface	Electrical interface for traction units according to NEM 652 standards with plug-in fixture
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel

Measurements

Length over buffer	176 mm
