

Tank wagon, GATX

Epoch:

Art. No.: 77462

Tank wagon, type Zacns, of the GATX Rail Austria.

New design!

- Finely detailed model with many separately applied plug-in parts
- Version with small GATX lettering

The four-axle tank wagon with a capacity of 95 m³ is used for transporting light-colored petroleum products such as kerosene, petrol, diesel, fuel oil and liquid chemicals. A typical feature of this type of wagon is the lowered walkway grid at the transition to the fill cover.

Specifications:
