

## 2 piece set stake wagons, ÖBB

ÖBB

Photomontage

Epoch: IV - V

14+

Art. No.: 34582

€76,90

The set contains two 4-axle narrow gauge stake wagons, type SSm/s, of the Austrian Federal Railways.

- Loaded with logs
- The wagon has a true to original underbody and new stakes
- The floor of the brakeman's platform is made from checker plate aluminum
- The locomotive frame is equipped with winches
- A partition separates the brakeman's platform from the loading bed
- Etched labeling plates mounted on the frame

The wagon factory Busch in Bautzen delivered from 1942 narrow-gauge goods wagons to the Deutsche Reichsbahn. As the wagons remaining in Austria after the Second World War were mainly used for timber transport, they received various modifications. At the ÖBB, these converted wagons were designated SSm/s. Some of these wagons were equipped with full sheet metal end walls and firmly welded stanchions.

### Specifications:

#### General data

Coupling In-house produced coupling
