

## Electric locomotive class 141, DB AG

Photomontage

Epoch: V

14+

Art. No.: 70794

€206,90

Electric locomotive class 141 of the Deutsche Bahn.

- Model in traffic red livery
- Etched walkways and wipers
- Rich detailing on the model with freestanding handles
- The headlights can be partially or entirely switched off with a DIP switch

The series E 41/141 was first delivered in 1956 for light mixed services on main and branch lines. It was the only series of the standard locomotive programme to be fitted with switchgear on the transformer's low-voltage side. The switchgear had a characteristic noise level, which, in addition to the sizeable tractive power jumps, led to the nickname "Firecracker".

### Specifications:

#### General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Number of axles with traction tyres	1
Number of driven axles	4
Flywheel	yes

#### Electrical

Interface	Electrical interface for traction units PluX22
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes

#### Measurements

Length over buffer	180 mm
