Art. No.: 71379

n.N

Steam locomotive class 038 of the German Federal Railway.

- Completely new design
- Finely detailed model with many separately applied plug-in parts
- Wheels with fine spokes
- Design with riveted tender and "Witte" smoke deflectors

For a long time, the class 038 steam locomotives with their riveted tenders and "Witte" smoke deflectors were standard on German branch lines. They usually hauled passenger trains and were therefore not replaceable in the local service for a long time. It was not until the increasing modernization at the Deutsche Bundesbahn that they were replaced by diesel and electric locomotives.

Specifications:

General data

Minimum radius 358 mm

Electrical

Interface Electrical interface for traction units PluX22

Head light Both sides of the vehicle are equipped with direction dependent triple headlights.

LED head light yes

Measurements

Length over buffer 214 mm
