

Electric locomotive Rc4 1174, Green Cargo

Photomontage

Epoch: VI

14+

Art. No.: 78458

€339,90

Electric locomotive Rc4 1174 of the Green Cargo.

- Model with blue livery and Green Cargo logo available for the first time
- Rich detailing with many separately attached plug-in parts
- With switchable high beam and individually switchable headlight or tail light in digital mode

The success of the classes Rc1 to Rc4 is based on the ASEA thyristor technology, used in Swedish locomotives since the 1960s. From 1967 to 1982, 265 locomotives were put into service. With 130 units, the fourth series was the largest of this locomotive class.

When the Swedish State Railways split up into different business divisions on the 1st of January 2001, all the Rc4s still in service were brought to Green Cargo and are now only used for freight transport.

Specifications:

General data

Coupling	NEM shaft 362 without close coupling mechanism
Minimum radius	358 mm
Number of axles with traction tyres	2
Number of driven axles	3
Flywheel	yes

Electrical

Interface	Electrical interface for traction units PluX22
Head light	Light changeover true to the Swedish original.
Digital decoder	PluX22
Decoder type	MX645P22
Sound	yes
LED head light	yes
Additional light function	yes
Buffer capacitor	yes

Measurements

Length over buffer

179 mm
