

Steam locomotive 86 1435-6, DR

DR

Photomontage

Epoch: IV

14+

Art. No.: 70022

€399,90

Steam locomotive 86 1435 of the Deutsche Reichsbahn.

Mold variant!

- The model is equipped with 16 bit sound - for an even better sound quality
- With a changed boiler line
- Delicately designed model with many extra applied plug-in parts
- Long cut out water boxes
- Fine metal wheel sets
- With switchable driver's cab lighting in digital mode
- Depot Rbd Halle, Bw Röblingen
- With set of etched signs included
- Smoke generator retrofittable

From 1928 to 1943, almost all German locomotive factories delivered class 86 to the Deutsche Reichsbahn Gesellschaft (altogether 775 locomotives). The 1,000 hp locomotives were designed to reach a maximum speed of 70-80 km/h; so the DR could use them in their primary application field for "branch lines", however, also for main and feeder lines. At the beginning of the 1950s, 164 class 86 locomotives were still used in the GDR. In 1970, the Deutsche Reichsbahn still provided 162 locomotives with an EDP-compliant running number but then scrapped them from 1973 on.

Specifications:

General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Number of axles with traction tyres	1

General data

Smoke generator Article number (digital)	Seuthe Nr. 11
Number of driven axles	4
Smoke generator retrofittable	yes
Flywheel	yes

Electrical

Interface	Electrical interface for traction units PluX22
Head light	Digitally switchable triple front headlights
Interior lighting	Yes
Interior lighting	LED
Interior lighting	Digital switchable
Interior lighting	Driver's cab lighting
Digital decoder	PluX22
Decoder type	MS450P22
Sound	yes
LED head light	yes
Buffer capacitor	yes

Measurements

Length over buffer	160 mm
