

Diesel locomotive class 108, DR

Photomontage

DR

Epoch: IV

14+

Art. No.: 36337

€262,90

Diesel locomotive class 108 of the Deutsche Reichsbahn.

Update!

- With revised drive
- Delicately designed model with many extra applied plug-in parts
- Freestanding, filigree handles
- In digital mode with switchable maneuvering lights (3x white on both sides) and individually switchable headlights or taillights
- With Henning sound

The Deutsche Reichsbahn designated four-axle mainline diesel locomotives for medium service as the class V 100 (from 1970: class 110). Compared to the original class 110, class 108 had a flow reverse gear and an optimised motor with reduced power. Following the new purpose as a shunting locomotive, the boiler could also be omitted; instead, cooler groups and a preheater were installed.

Specifications:

General data

Coupling	NEM shaft 358 with close coupling mechanism
Minimum radius	267 mm
Number of driven axles	4
Traction tyres	2
Flywheel	yes

Electrical

Interface	Electrical interface for traction units PluX16
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
Digital decoder	PluX16
Decoder type	MX648P16

Electrical

Sound	yes
-------	-----

LED head light	yes
----------------	-----

Additional light function	yes
---------------------------	-----

Measurements

Length over buffer	116 mm
--------------------	--------
